[準学士課程(本科 1-5 年) 学習教育目標] (3)	[システム創成工学教育プログラム 学習・教育目標] C-2 (80%), A-1 (20%)	[JABEE 基準] (f) , (a)	
<p>[講義の目的] This course has several goals, including improving vocabulary range , learning basic fluency skills such as how to describe daily objects, how to give directions, and how to talk about future dreams and goals. Students also practice to express their own opinions and ideas in form of simple “presentation” in English.</p>			
<p>[講義の概要] English conversation is not an interview; simply asking and answering questions will not lead to natural speech. Students will develop their active vocabulary as well as practice using communication strategies. Students will make a speech, pair dialogue, and presentations in front of classmates.</p>			
<p>[履修上の留意点] There is a saying “Use it, or lose it,” and this is definitely true for learning a language. Tests can help with new words, but only practice using the language will help students take control of English and make it their own. Shadowing is a strategy that students can use outside the class to practice both speaking and listening skills. To explain one’ s own opinion or idea is a very important skill. Presentation is the way to improve this skill and will help you succeed in business or university.</p>			
<p>[到達目標] Be able to make a speech in English. Be able to do presentation in English. Gain speaking self-confidence for practical situations.</p>			
<p>[評価方法] Class Participation including tasks (40%) / Class presentations (40%) / Tests (20%)</p>			
<p>[教科書] [補助教材・参考書] Hand-made printed matters.</p>			
<p>[関連科目] General knowledge on current topics and basic knowledge of technology should be expected in conversation and presentation.</p>
